

TowerFeed for HP LaserJet (M)90xx series

Impressive printing system

Insurance companies, banks, law offices, hospitals, government, transportation organizations and many others in need of high paper capacity or several media types, sizes and forms welcome the TowerFeed.

The TowerFeed consists of several trays (depends on model), with a capacity of 500 sheets per tray. When combined with a HP LaserJet printer, a unique configuration arises, offering new dimensions in cost saving and document printing efficiency..

Copies and multi-part-forms

Print extra copies with the printer using paper from a tray with plain paper. You will get a perfect document, not a copy of a copy.

For multiple copies or simulating multi-part-forms use colored papers from other trays. This is an economical procedure and clearly identifies the copies and their destination.

Remote paper selection

Changing paper is no longer a time-consuming and disruptive routine. Select the required paper directly on your terminal and get complex jobs printed completely.

Duplex printing

Cost savings on paper and postage fees make double-sided printing popular. Preprints have to be put into the tray the other way round. However, this becomes obvious to many users only at the time of picking up the print-job - printed upside-down. Preprints used for regular and duplex printing, put in two two different trays, solve that problem.

Easy installation

Place your HP LaserJet on top the TowerTray, connect the cables and switch on the printer. The printer will automatically initialize the TowerFeed and the printer is now ready to be configured.

Available models	TF 4-bin floormodel	TF 6-bin floormodel	TF900
Article number	44.65.0x	66.65.0x	TF9001000
Quantity of trays	4	6	3
Capacity of trays	Up to 500 sheets (depends on paper weight per m2)	Up to 500 sheets (depends on paper weight per m2)	Up to 500 sheets (depends on paper weight per m2)
Possible paper sizes	standard A4	standard A4	A5, B5, Executive, US Letter, A4, US Legal, US Ledger, A3, B4, Letter (rotated), A4 (rotated)
