

TowerTray

making paper work for you

TowerTray™ printing system with up to 9 paper types online Insurances, Banks, Law offices, Hospitals, Medical-, Travel-, Industrial-, Government-, Transportation organizations and others in need of high paper capacity or several different media types, sizes and forms welcome TowerTray. It provides additional input trays for up to 4'100 sheets. HP LaserJet's with TowerTray have up to 9 input trays - a unique organizational tool offering new dimensions in cost savings and document printing efficiency.

Time consuming and disruptive routines by changing paper trays are now history. Select the required paper directly on your terminal and get complex jobs printed completely.

Print extra copies instead of copying them. You will save time and get perfect documents at lower cost. Multipart-forms can be simulated by printing copies on differently colored paper. This is an economical procedure and clearly identifies the copies and their destination.

How TowerTray works

Configure TowerTray with up to 4 trays and place your HP LaserJet with or without HP's optional trays on top of it. Install the tip-over prevention's, connect the interface cable and mains and power it on. The printer will automatically recognize the reliable TowerTray that looks like an HP option. System support is available for Windows™ environments.

TowerTray allows high volume printing of media of the same or different type without the need to frequently reload trays.
