

MobilePrint

Mobile printing made easy

MobilePrint is a leading mobile print software solution that installs in minutes inside the customers private network, and lets users print from any smartphone, tablet, or mobile computer with extreme ease.

Thousands of companies and organizations worldwide use MobilePrint, from primary schools and small offices, to multi-

national enterprises and leading universities. Whether you have one printer or a thousand, MobilePrint fully integrates with your existing printing infrastructure.

Whether users or visitors are onsite or on the other side of the world, at a satellite office, they can print securely to any printer in the organization.

Five simple ways to print: Email Print, Web Print, Driver Print, Mobile Print, Google Cloud Print (all optional, you can enable only the methods you want to allow users to use)

Email Print

Printing from any mobile device, is as simple as sending an email with attachment. Mobile devices, such as Apple, Android, Windows or Blackberry.

Upload via Web

Upload documents to print using a web browser.

Print via a driver

Just one simple setup, and mobile users can print securely directly from their computer (Windows, Mac or Linux).

Mobile Print

Wireless printing right from your iPad, iPhone or Android devices.

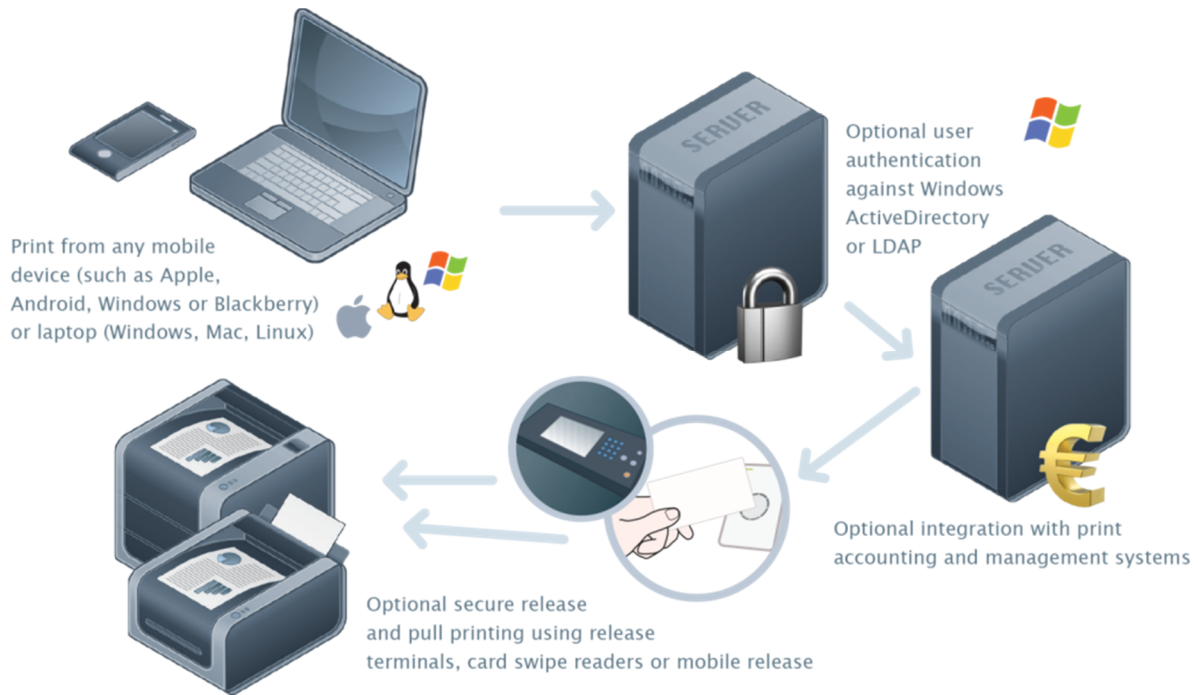

Google Cloud Print

Print from Chromebooks, Android devices and Google Apps, via Google Cloud Print to any printer in MobilePrint.

Integration for authentication, cost recovery or secure printing

MobilePrint can integrate with user directories such as ActiveDirectory, LDAP and 3rd part print management & accounting systems, to ensure only authorized users can print and every job is accounted for.
